

ENGINEER WILL
BUILD U. S. SHIPS

**George Schobinger Quits
Reclamation Work for
Shipbuilding Work.**

George Schobinger, assistant engineer of the Rio Grande project, who has been on the Tuma and Rio Grande projects for seven years, will leave within a few days to take up engineering work in connection with the building of merchant marine ships by the emergency fleet commission in Philadelphia. Mr. Schobinger has had charge of the construction of concrete canals and flumes in the Rincon and Matilla valleys.

POISON TRACES IN STOMACH
OF W. A. HACKLEY, IS REPORT

An autopsy reported to have been held on the body of William A. Hackley at Berkeley, Calif., in the western laboratories, resulted in the finding in the stomach of the dead man traces of chloral hydrate, a poison, and of a skull fracture being a surface scalp wound, it was claimed in the report from Berkeley. Mr. Hackley was found in an unconscious condition on South Santa Fe street, El Paso, the night of September 24 and died at the county hospital about 24 hours later.

Officers at work on the case have been setting out the presumption that Hackley met with foul play, but no clues as to the identity of his assailants are known to have been discovered to date. A reward of \$2500 for the arrest and conviction of the parties responsible for his death has been offered by O. N. Mason, an Albuquerque, N. M., attorney, and another for \$100 for information identifying the person who called at Mr. Hackley's apartment here the night of the supposed assault.

MUST PREVENT
CATTLE MALADY

**Dr. Bray, Back From Bar-
stow, Describes Disease
Killing Stock There.**

Preventive measures are recommended by Dr. Thomas A. Bray, in charge of the local bureau of animal industry, to check the spread of the outbreak of "hemorrhagic septicemia" which he has just investigated at Barstow, Texas.

"There is nothing alarming about the outbreak," Dr. Bray said Wednesday. "But ranchers should be very careful to take the proper measures to prevent its spread. The carcasses of dead animals should be destroyed and the hides carefully disinfected. The effort at Barstow has been a success in that the proper disposition of carcasses of all dead animals."

Malady of Blood. There have been only a few cases of the disease reported in the Barstow neighborhood within the past 30 days. About 20 of these animals died. The disease is a malady of the blood and is caused by the presence of a bacillus in the blood in great numbers. The bacillus has been isolated, but thus far no direct treatment has been found. If the joints are attacked the animal limps.

The infection is generally introduced into the animal's blood by a scratch of the mouth or tongue, or a bite. The disease has only recently been studied and is only reported from six or seven different states. Assistant state veterinarian Dr. L. L. Meeker was also investigating the outbreak, Dr. Bray said.

SUNDAY VISIT TO CAMP CODY
PLAN OF MANY BUSINESS MEN

On the invitation of officers at Camp Cody, members of the El Paso Chamber of Commerce will visit the New Mexican military camp Sunday, leaving on the Southern Pacific at 7:45 o'clock in the morning and returning in the evening.

The invitation was extended by Gen. F. G. Dubois, Gen. George H. Harries and Col. P. L. Hall. The trip is being arranged by Maj. Paul Harvey, senior student instructor at the El Paso high school. He appeared Tuesday afternoon before the directors of the El Paso chamber of commerce to explain the matter.

Among those who have promised to go are G. B. Ryan, John M. Wyatt, George H. Clements, D. C. Cales, G. A. Martin, Maurice Schwartz, B. L. Farar, H. M. Andrews, W. B. Seaton, J. Deane, P. C. Cales, Jr., H. P. Deady and Dr. William Sample. B. B. Orndorff and Robert Kracker may be among the members.

ICE MEN MEET TONIGHT.

Conservation of ice and materials entering into refrigeration will be considered at a meeting of ice manufacturers of El Paso to be held tonight at 8 o'clock at the chamber of commerce.

SHOULD INVITE
THE CATTLEMEN

**Secretary Amonett Asserts
There's Plenty of Hotel
Room for Convention.**

"Although there have been rumors for some time concerning the consolidation of the Texas Cattle Raisers' association and the Panhandle and Southwestern Cattlemen's association, I know of no foundation for the suggestion," said W. L. Amonett, secretary of the latter association. "In fact, as far as I know there is no one in particular behind the rumor. Since San Angelo cannot entertain the cattle raisers' association meeting in the spring I think it would be a splendid thing for El Paso to have it come here. Something ought to be done to induce the association to come here and urging the directors might be of some benefit."

Hotels Not Crowded. "It is a bad thing for El Paso to allow the rumor to circulate that its hotels are so filled that there is no room for the delegates to the meeting. That is not true. The hotels are far from crowded."

Things are very quiet in that line and El Paso can more than take care of all the people who might attend the meeting.

Going to Executive Meeting. It is expected that the matter of the consolidation of the two organizations will be taken up for consideration by the Cattle Growers' association at the executive meeting, which is to be held at San Angelo on December 11. The place of the spring meeting will be decided on at that meeting.

Curry, honorary president of the association, is not certain whether he will be able to attend the meeting at San Angelo on account of other business. Charles M. Newman, a director, will probably attend. Dallas, Oklahoma City and other places may invite the association.

SAYS ADVERTISING SOLVED
BY LABORATORY METHODS

Laboratory methods in solving advertising problems were discussed by Prof. Howard C. Taylor in a talk Wednesday noon. How research works in advertising problems in order to get authoritative results was being done at Columbia university was told by Mr. Taylor.

Among problems of advertising mentioned by Prof. Taylor were the following: "What is the function of advertising?" "How to secure attention?" "Buyers' attitude of mind?" "Creation of desire for article advertised?" "Getting response to advertisement?"

"Eye movement" is an important item for advertising men, Prof. Taylor declared. "When you see a sign, then you jump," he said.

Announcement of the formal opening of the school of advertising and salesmanship Friday evening at 7:30 o'clock. In the court house, was made by secretary E. W. d'Almeida. Addresses will be made by Robert Kracker, George H. Clements and others, he said.

Judge Adrien Pool appeared before the club and secured signatures to a petition to the county commissioners for an election for the issuance of bonds for road improvements amounting to \$150,000, from El Paso to Yuleta, \$175,000 for the road from El Paso to Newman on the New Mexico boundary, and \$25,000 for the smelter road from the Hart viaduct to the Santa Fe tracks.

FEEL CAKE AT
GALVESTON OUT

**But There's More at Port
Arthur; With More Cars
Now Shipments Start.**

"The cottonseed cake at Galveston is almost exhausted," said W. L. Amonett, secretary of the Panhandle and Southwestern Cattlemen's association, "but there is a supply of cake at Port Arthur, Tex., although I do not know how much. The car situation has been vastly relieved and the cattlemen in this territory are shipping cattle to better ranges steadily."

Ray Williams, El Paso, shipped 18 cars of cows from Lordsburg to Shinarump, Tex.

J. H. Nations received 25 cars of yearling steers from Hadlum, Ariz., at El Paso.

Kraft and Madore shipped 27 cars of mixed steers from Nogales, Ariz., to El Paso.

Things are very quiet in that line and El Paso can more than take care of all the people who might attend the meeting.

Famous in a Day for Her Beautiful
Complexion, Oatmeal Combination Does It

A Free Prescription Does Its Work Overnight. You Can Prepare It at Your Home.

New York. It is my own discovery and it takes just one night to get such marvelous results, says Mrs. Edna Wilder, when her friends asked her about her wonderful complexion and the improved appearance of her hands and arms. You can do the same thing if you follow my advice, she says. I feel it my duty to tell every girl and woman that this wonderful prescription did for me. Just think of it. All this change in a single night. I never tire of telling others just what brought about such remarkable results. Here is the identical prescription that removed every defect from my face, neck, hands and arms. Until you try it you can form no idea of the marvelous change it will make in just one application. The prescription which you can prepare at your own home is as follows: Go to any grocery and get ten cents worth of ordinary oatmeal and from any drug store a bottle of dermivul. Prepare the oatmeal as directed in every package of dermivul and apply night and morning. The first application will astonish you. It makes the skin appear trans-

parent, smooth and velvety. I especially recommend it for freckles, tan, sun spots, coarse pores, rough skin, ruddiness, wrinkles, and, in fact, every blemish the face, hands and arms are heir to. If your neck or chest is discolored from exposure, apply this combination there and the objectionable defect will disappear as if by magic. It is absolutely harmless and will not produce or stimulate a growth of hair. No matter how rough and unevenly the hands and arms, or what abuses they have had through hard work and exposure to sun and wind, the oatmeal-dermivul combination will work a wonderful transformation in 12 hours at the most. Thousands who have used it have had the same results I have had.

Note. To get the best effect be sure to follow the complete directions contained in every package of dermivul. You have only to get dermivul and oatmeal. You need nothing else and it is so simple that any one can use it. And be assured that any girl or woman can afford it. The manufacturers and druggists guarantee that there will be a noticeable improvement after the first application or they will refund the money. It is sold this city under a money refund guarantee by all druggists including Kelly & Pollard.—Adv.

**Nutrient for the nations at war is as vital
